Researcher Spotlight

Meet Elizabeth Hutchins, from the Transcriptomics Working Group!

Elizabeth Hutchins is a computational scientist at the Translational Genomics Research Institute (TGen) with an interest in bioinformatics and transcriptomics, particularly when applied to neuroscience-based questions. The AMP PD team first met Elizabeth as a member of Dr. Van Keuren-

Jensen's project to sequence RNA from extracellular vesicles, and quickly enlisted her as a valued expert in our Transcriptomics Working Group. From the beginning, Elizabeth has been the person our team turns to for expert advice on analyzing AMP PD's transcriptomics data and preparing it for sharing on the AMP PD platform. We would not be able to make this data available to our users without her, and we are delighted to introduce you to her here.
